

Global Pulse Oximetry Workshop

Suggested Timetable

- | | |
|----------------------------------|--|
| 1. Introduction | (20 min) |
| 2. WHO Pulse Oximetry Tutorial 1 | Small group/Lecture/Self Learning (45 min) |
| 3. WHO Pulse Oximetry Tutorial 2 | Small group/Lecture/Self Learning (45 min) |
| 4. Clinical Scenario Workshop | Case based discussions (90 min) |
| 5. Discussion | (30 min) |

WHO Pulse Oximetry Tutorial 1

Objectives

At the end of this teaching session, participants should:

1. Understand the function of a pulse oximeter
2. Know how oxygen is transported to the tissues
3. Understand how a pulse oximeter can help you in anaesthesia

WHO Pulse Oximetry Tutorial 2

Objectives

At the end of this teaching session, participants should:

1. Understand how to use an oximeter correctly
2. Know what can interfere with the function of an oximeter
3. Know how to maintain a pulse oximeter
4. Understand how to manage a falling SpO₂ during anaesthesia

Clinical Scenario Workshop

At the end of this teaching session, participants will understand how to apply the action plan for managing SpO₂ < 94% using the scenarios provided.

Discussion

This final session allows for further discussion and feedback.
