

COVID-19 PPE

How do I safely wear my PPE?

More than one method of donning and doffing may be acceptable. Refer to your healthcare facility's guidance.

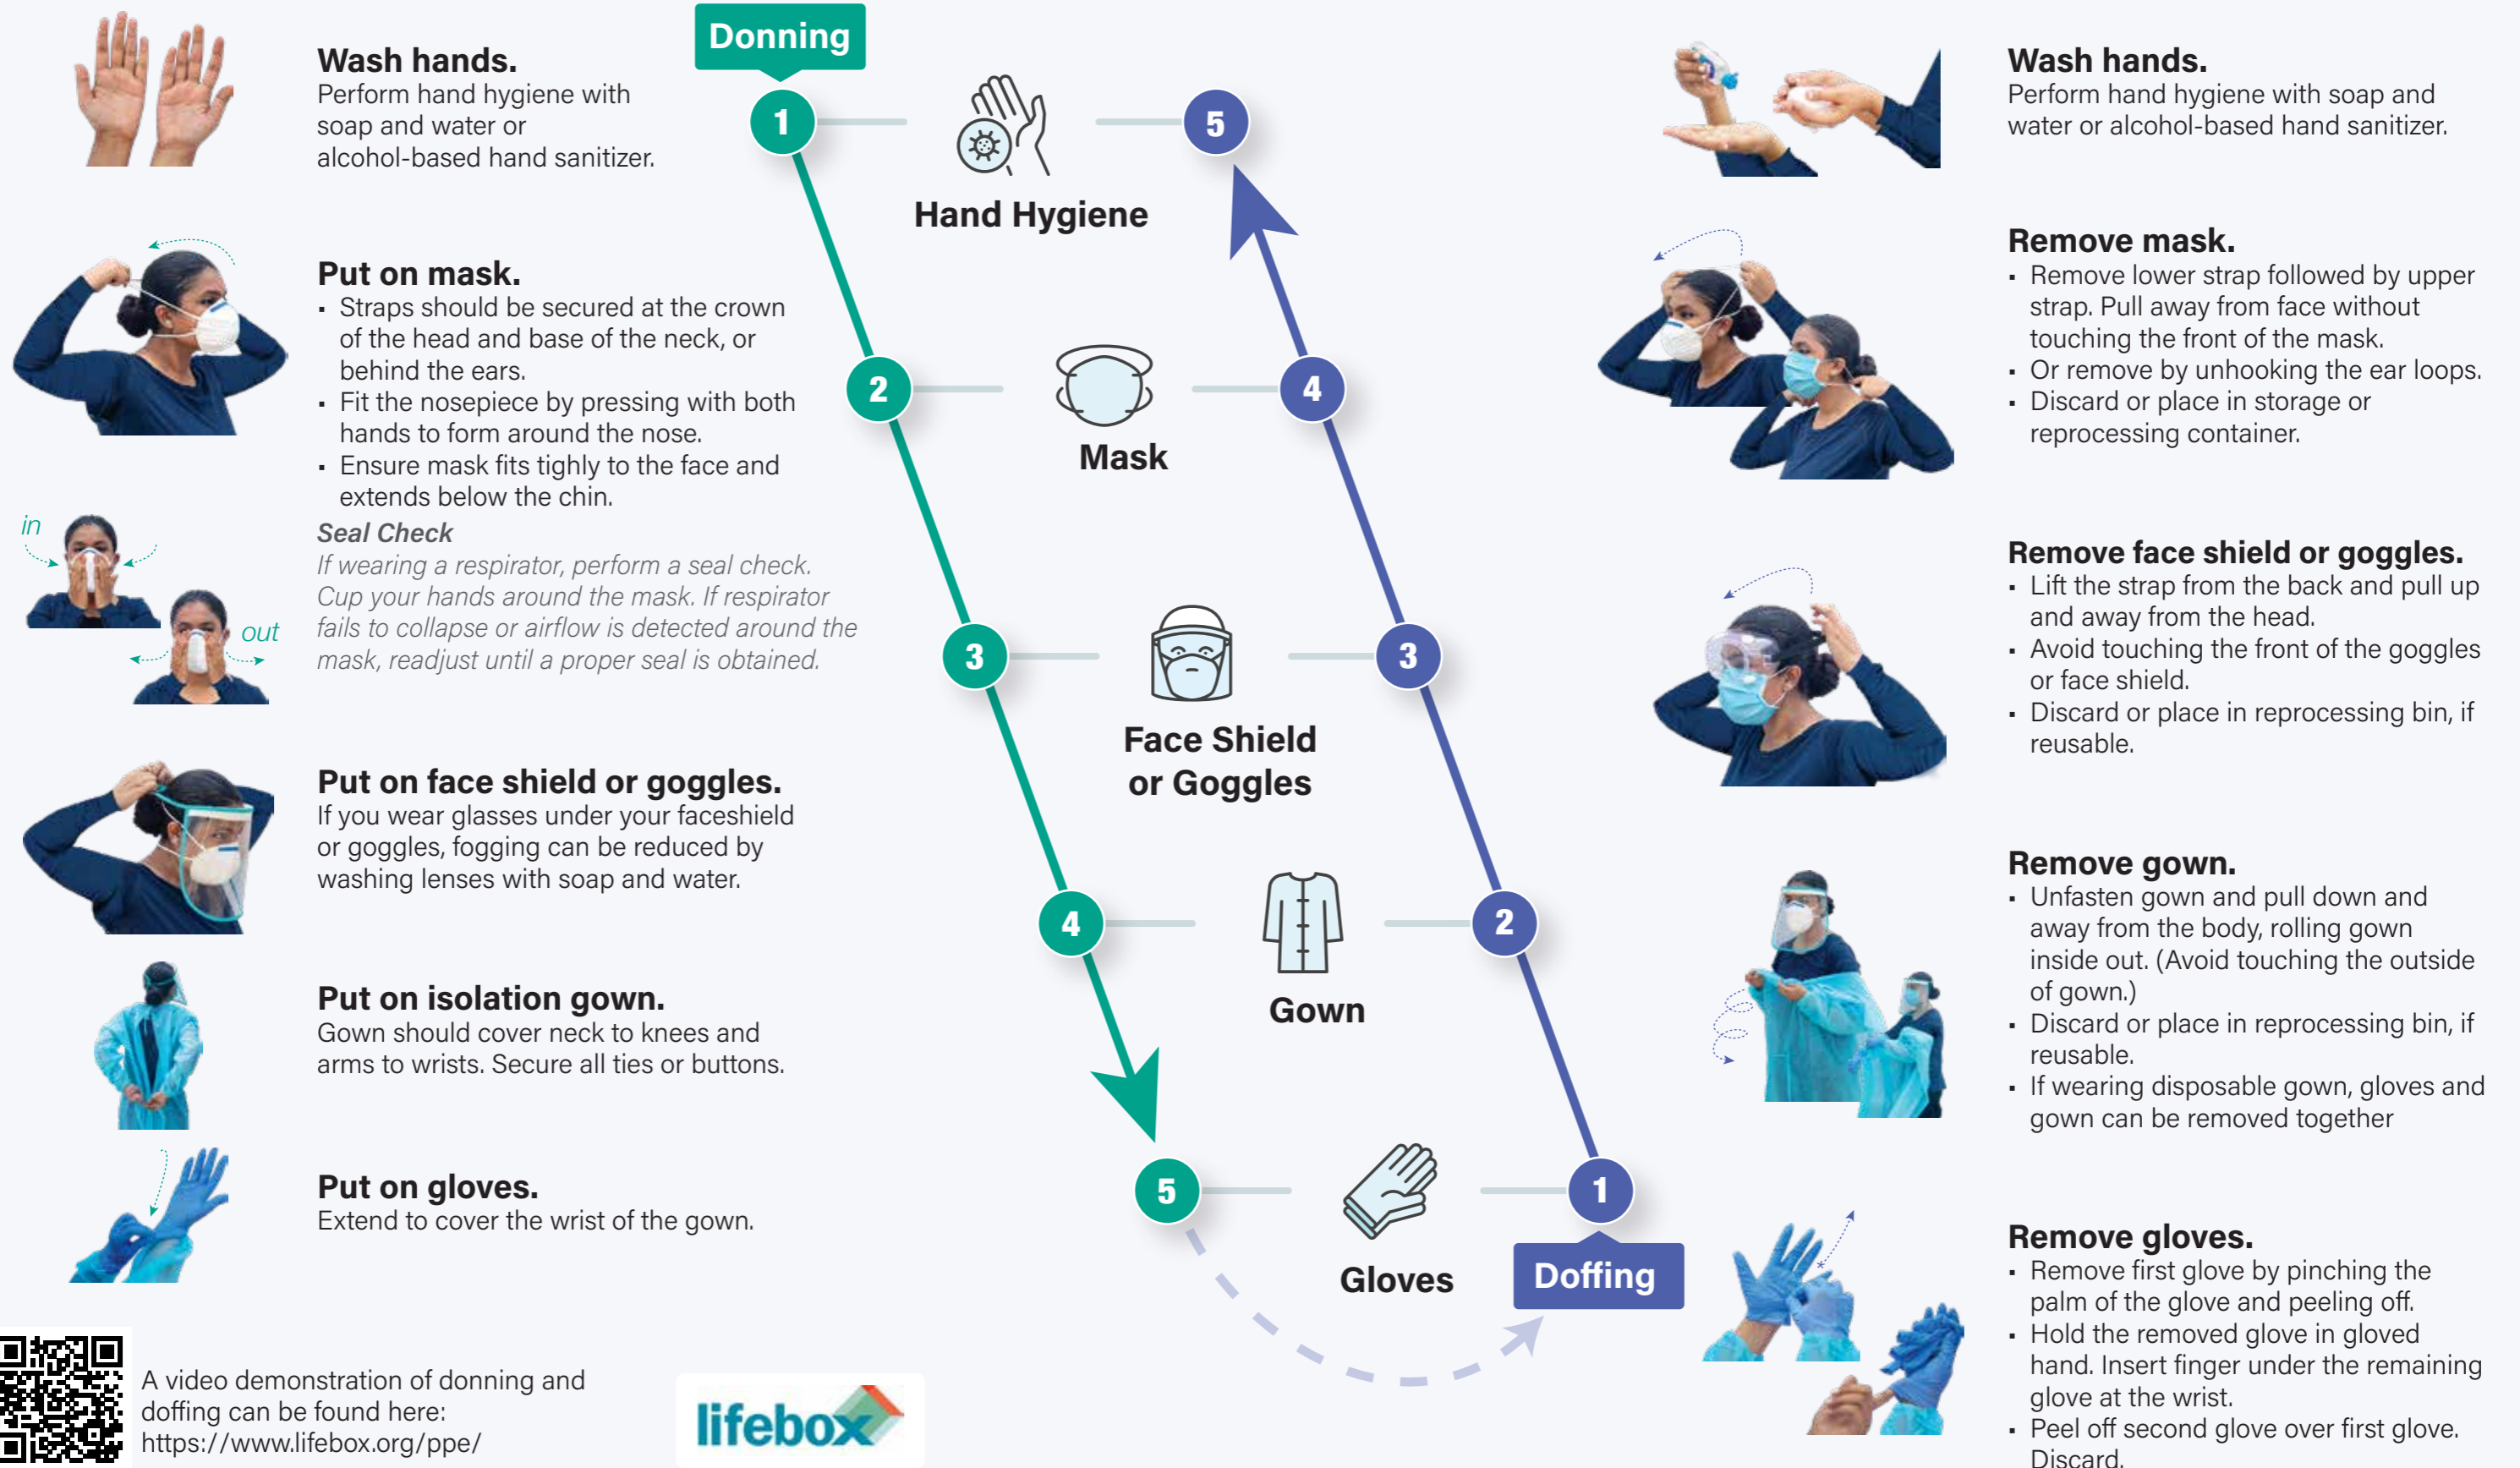

Consider having someone observe your donning and doffing to ensure appropriate steps are followed.

If hands become contaminated during doffing (such as by contacting the outside of the PPE), immediately perform hand hygiene before resuming doffing.

Disposable PPE can be discarded in regular trash unless heavily soiled with blood or other bodily fluids.

A video demonstration of donning and doffing can be found here:
